## MY PROFILE

I'm an enthusiastic 18-year-old student and self-taught Web developer from India. I currently specialize in transforming ideas into a fully functional website. The feeling of satisfaction when a project is completed and the client is happy is what drives me to continue learning and improving my skills.

In addition to web development, I enjoy learning about other aspects of technology such as artificial intelligence and the Internet of Things. I believe that technology has the power to change the world and I want to be a part of that change.

I am excited to see where my passion for web development and technology will take me and I am eager to continue expanding my knowledge and skills in other fields as well.
